

Mundial 26 — Master Spec

For: Branko **From:** Pablo **Brand:** Anomalistic **Product:** Zona Mundial (zonamundial.mx)
Supersedes: previous Spanish ajustes doc **Scope:** Consumer app (App 1) + admin inventory feature

Locked decisions

#	Decision
1	Add 6 new countries to album: BIH 🇧🇮🇭 SWE 🇸🇪 TUR 🇹🇷 CZE 🇨🇪 IRQ 🇮🇶 COD 🇨🇩
2	"Stars" section = 20 players, classified in 3 tiers (GOAT / CRACK / STAR)
3	Coca-Cola partnership uses their official brand kit (signed agreement pending)
4	Production domain: <code>zonamundial.mx</code>
5	Referral program: 5% of friend's first purchase , credited to inviter
6	Full auth: email/password + Google + Apple + social logins
7	Album renamed to "USA · Méx · Can 26"
8	Tap behavior: 1 tap = own, 2+ taps = repeats, long press = decrement

1. Sticker tap behavior (critical change)

Action	Result
1 tap	0 → 1 (mark as owned)
2 tap	1 → 2 (add 1 repeat)
3 tap	2 → 3 (another repeat)
Long press (~500ms)	-1 (decrement, floor at 0)

Implementation:

- Remove `StickerEditModal.jsx` (no longer needed)
- Tap normal → `haptic("light")` + `scale(0.9)` for 200ms
- Long press → `haptic("medium")` + decrement
- Attempting to decrement below 0 → `haptic("heavy")` + no state change

Visual states (unchanged):

- Count = 0: grayed out, faded number
 - Count = 1: white bg, green checkmark
 - Count ≥ 2: white bg + gold +N badge (N = count - 1)
-

2. Share repeats button

Placement: Header of Álbum tab, left of Settings. **Icon:** `Share2` from `lucide-react`.

Behavior:

1. Build the message (format below)
2. If `navigator.share` available → native share sheet (WhatsApp, iMessage, etc.)
3. Fallback → copy to clipboard + toast "List copied"

Exact message format:

Mi Álbum Mundial 26 - Lista
USA · Méx · Can 26

Repetidas

FWC 🏆: 1

FWC 🌐: 7

FWC 🏠: 12, 18

MEX 🇲🇪: 4, 11, 13, 15, 16, 17

RSA 🇷🇸: 1, 6, 7, 10, 11, 17, 19

...

Descarga la app

<https://zonamundial.mx/descargar>

Rules:

- Only sections with at least one repeat (count ≥ 2)
 - Order = official album order (see Section 5)
 - One section per line: `CODE FLAG: N1, N2, N3...`
 - Sticker numbers only, no country prefix (4, 11 , not MEX04, MEX11)
 - Blank line before "Descarga la app"
-

3. Settings button placement

Shown: top-right of header on Home, Álbum, Stats, QR **NOT shown:** Tienda (Shop)

Style:

- Circular 40 × 40
- `Settings` icon from lucide, 20 × 20, color #0B1F15 , opacity 0.6
- No background, only ripple on tap

On tap: navigate to `/settings` (standalone screen, not a tab)

Settings page contains: edit name, edit nationality, notifications toggle, language preference, "About app", "Terms & Privacy", "Sign out"

4. "Refiere y gana" — referral program

Mechanic: Inviter gets **5% of every purchase the referred friend makes**, credited as in-app credit. No cap, no expiration in v1.

Placement: Featured card on Home, between hero CTA and "Quick Actions" grid.

Card visual:

- Gradient green → gold
- Gift icon
- Title: "Invita a un amigo, ganas 5%"
- Subtitle: "Por cada compra de tu amigo, ganas 5% de crédito."

- CTA: "Mi código" → navigates to `/referral`

Referral screen contains:

- Personal QR code with referral code
- Shareable link: `https://zonamundial.mx/?ref=PABLO-A7K`
- Buttons: "Copy link", "Share via WhatsApp"
- Stats: friends invited / credits earned / credits available

Backend logic:

- On signup, capture `?ref=` query param → store as `referredBy` on user
- On every purchase by referred user, compute $5\% \times \text{subtotal}$, credit inviter's wallet
- Credits redeemable at checkout (apply as discount, no cash withdrawal)

5. Album structure — 48 teams + FWC

Album title: USA · Méx · Can 26

Special FWC sections (3)

ID	Emoji	Name
FWC-T		FWC Trofeo
FWC-W		FWC Mundo
FWC-H		FWC Historia

National teams (48)

Order matches official album order:

Group 1 (hosts + AFC + selected):

MEX 
 RSA 
 KOR 
 CAN 
 QAT 
 SUI 
 BRA 
 MAR 
 HAI 
 SCO 

Group 2:

USA 
 PAR 
 AUS 
 GER 
 CUW 
 CIV 
 ECU 
 NED 
 JPN 
 TUN 

Group 3:

BEL  EGY  IRN  NZL  ESP 
CPV  KSA  URU  FRA  SEN 

Group 4:

NOR  ARG  ALG  AUT  JOR 
POR  UZB  COL  ENG  CRO 

Group 5 (final 8 including 6 newly qualified):

GHA  PAN  BIH  SWE  TUR 
CZE  IRQ  COD 

Stickers per team: 20 each (placeholder — confirm against physical album) **Total stickers:**
48 × 20 + FWC sections = ~980+

6. Stars section (album + shop)

Album side: 20 slots, one per player. User collects 20 stickers to complete the section.

Shop side: Each player ships as **4 separate SKUs** by rarity tier. 20 players × 4 tiers = **80 SKUs**.

Player tier classification

Tier	Players	Count
GOAT	Messi, Cristiano, Haaland, Yamal	4
CRACK	Vinicius, Modric, Salah, Bellingham, Mbappé, Hakimi, Son, Valverde	8
STAR	Doku, Davies, Díaz, Caicedo, Wirtz, Jiménez, Gakpo, Pulisic	8

Pricing matrix (MXN)

Player tier	BASE	BRONCE	PLATA	ORO
GOAT	\$500	\$800	\$5,000	\$10,000
CRACK	\$300	\$500	\$3,000	\$4,000
STAR	\$100	\$200	\$1,500	\$2,500

7. Admin inventory feature

New page: `/admin/inventory`

Tracks physical stock per (player × tier) cell. Mirrors Pablo’s spreadsheet.

Initial inventory + per-cell value

Player	Tier	BASE	BRONCE	PLATA	ORO	Stock value (MXN)
Messi	GOAT	9	5	3	2	\$43,500
Cristiano	GOAT	2	2	3	1	\$27,600
Haaland	GOAT	10	4	2	1	\$28,200
Yamal	GOAT	13	12	1	1	\$31,100
Vinicius	CRACK	10	7	2	1	\$16,500
Modric	CRACK	17	7	1	2	\$19,600
Salah	CRACK	8	5	1	2	\$15,900
Bellingham	CRACK	14	4	1	1	\$13,200
Mbappé	CRACK	8	7	6	1	\$27,900
Hakimi	CRACK	9	5	1	2	\$16,200
Son	CRACK	11	8	2	1	\$17,300
Valverde	CRACK	10	7	3	0	\$15,500
Doku	STAR	13	5	1	1	\$6,300
A. Davies	STAR	14	6	4	0	\$8,600
Luis Díaz	STAR	14	1	3	2	\$11,100
Caicedo	STAR	9	2	2	0	\$4,300
Wirtz	STAR	10	4	2	1	\$7,300
R. Jiménez	STAR	16	10	0	0	\$3,600

Gakpo	STAR	13	11	2	1	\$9,000
Pulisic	STAR	11	5	7	0	\$12,600

Inventory totals:

Tier breakdown	BASE	BRONCE	PLATA	ORO	Total
Units in stock	211	117	47	21	396
GOAT value	\$17,000	\$18,400	\$45,000	\$50,000	\$130,400
CRACK value	\$26,700	\$25,000	\$51,000	\$40,000	\$142,700
STAR value	\$10,000	\$8,800	\$31,500	\$12,500	\$62,800
TOTAL VALUE					~\$335,900 MXN

UI specification

PLAYER	TIER	BASE	BRONCE	PLATA	ORO	VALUE
Messi	GOAT	9	5	3	2	\$43,500
Cristiano	GOAT	2	2	3	1	\$27,600
... 20 rows						
TOTAL		211	117	47	21	\$335,900

[Search] [All|BASE|BRONCE|PLATA|ORO] [Export CSV] [Restock]

Cell interactions:

- Click → inline edit
- Hover + / - quick adjust
- Red badge when stock < 3 (low stock alert)
- Gray + strikethrough when 0 (out of stock)
- Auto-decrement on Stripe webhook (`payment_intent.succeeded`)

Top controls:

- Search by player

- Filter chips: All / BASE / BRONCE / PLATA / ORO
- Total inventory value (live updated)
- Export CSV button

Bulk actions:

- "Restock" modal → bulk add stock (e.g., +5 to all BASE tier)
 - "Print picking list" → PDF with SKU + qty for warehouse
 - "Set tier price" → update all SKUs in a row at once
-

8. Shop redesign

Remove the 4 subtabs (Completar álbum / My Panini / Catálogo / Packs). Replace with a vertical scroll of 4 sections.

Header

- Title: "Tienda"
- Subtitle: "Zona Mundial Shop"
- Cart icon top-right with item count badge
- **No Settings button** here (rule from Section 3)

Section 1 — Mi Panini (hero)

- Full-width hero card
- Visual: 3-frame animation (selfie → arrow → Panini sticker)
- Title: "Crea tu sticker personalizada"
- Subtitle: "Tu cara en una carta estilo Panini oficial. \$200."
- CTA: "Crear mi Panini" → opens `/shop/my-panini`

Section 2 — Extra Stickers

- Full-width card
- Visual: collage of premium stickers (Stars section)
- Title: "Obtén tus stickers favoritas"

- Subtitle: "GOATs, CRACK, STAR. Base, Bronce, Plata u Oro."
- CTA: "Explorar extras" → opens `/shop/extras`

Section 3 — 📖 Llena tu álbum (dynamic)

- Full-width card, reactive to user album state
- Headline: "Te faltan {N} stickers"
- Progress bar visual + percentage
- Total cost: "\$X,XXX"
- CTA: "Completar álbum" → opens `/shop/album` with 4 internal tabs:
 1. Faltantes
 2. Recomendadas
 3. Comprar intercambio
 4. Packs sugeridos

Section 4 — 🏆 Productos del Mundial

4a. Horizontal carousel:

◀ [Playeras] [Balones] [Gorras] [Álbumes] [Pines] [Coleccionables] ▶

4b. Vertical grid (below carousel):

- 2 columns
- Each card: image, name, price, + quick-add button
- Tap → `/shop/product/:id` detail page
- Badges:  Nuevo ·  Limitado ·  Agotándose (stock < 10) · ✓ Oficial FIFA

Removed from Shop (moved to Checkout)

- ❌ Pickup / Express / Nacional selector
- ❌ Address form
- ❌ Payment method selector

All of the above lives in `/checkout` only.

9. Auth (full social login)

Flow:

- Welcome screen (skip-able for browse-only)
- Sign up / Log in choice
- Options: Email + password / Google / Apple / Facebook
- "Sign in with Apple" required (Apple Store rule when offering Google)
- After login, link existing localStorage state to account (one-time merge)

Required for:

- Saving album state cross-device
- Receiving referral credits
- Tracking referral codes
- Order history
- Cart sync across devices

Optional for:

- Browsing catalog
- Adding to local cart
- Viewing album (read-only) on first visit

10. Backend changes for Branko

New Prisma models

```
model StarPlayer {
  id          String    @id @default(cuid())
  name        String    @unique
  country     String
  flag        String    // emoji
  tier         PlayerTier // GOAT | CRACK | STAR
  albumSlot   Int       // 1-20
```

```

    stock      StarPlayerStock[]
}

model StarPlayerStock {
    id          String    @id @default(cuid())
    playerId    String
    player      StarPlayer @relation(fields: [playerId], references: [id])
    rarity      Rarity    // BASE | BRONCE | PLATA | ORO
    count       Int       @default(0)
    price       Int       // MXN per unit, derived from tier+rarity matrix
    updatedAt   DateTime @updatedAt
    @@unique([playerId, rarity])
}

model User {
    // ... existing fields ...
    referralCode String    @unique // e.g., "PABLO-A7K"
    referredBy    String?
    credits       Int       @default(0) // MXN credits from referrals
    authProviders String[] // ["email", "google", "apple", "facebook"]
}

enum PlayerTier { GOAT CRACK STAR }
enum Rarity      { BASE BRONCE PLATA ORO }

```

New endpoints

GET	/admin/inventory	→ full grid
PATCH	/admin/inventory/:playerId/:rarity	→ update count or price
POST	/admin/inventory/restock	→ bulk add
GET	/admin/inventory/export.csv	→ CSV download
POST	/auth/signup	→ create user + handle ?ref=
POST	/auth/login/:provider	→ email google apple faceb
GET	/referral/me	→ my code + stats
POST	/referral/credit	→ internal, triggered by sale we

Stripe webhook update

On `payment_intent.succeeded`:

1. Parse line items
2. For Star SKUs → decrement `StarPlayerStock.count`
3. If user has `referredBy` → credit inviter with 5% of subtotal

11. Open questions (still need Pablo)

1. **Tier prices for STAR ORO** — confirm \$2,500 is final (it's a STAR going to ORO, which is unusual). Same for the 4 cells with 0 inventory (zero ORO means no SKU, or just out of stock?).
2. **6 missing teams' real player rosters** — once received, regenerate sticker IDs.
3. **Stickers per team** — 20 confirmed, or varies? Need physical album reference.
4. **Coca-Cola brand kit PDF** — when does Pablo receive it?
5. **Real product photos** — for the shop's "Productos del Mundial" section, when are these ready?
6. **Mi Panini flow** — auto-generated by Canvas filter (instant), or human-designed (24h turnaround)?
7. **Apple/Google developer accounts** — both set up for TestFlight and Play Console?
8. **Referral credit redemption rules** — can credits be used on the entire cart, or only on certain SKU categories? Any minimum balance to redeem?

12. Files affected

Frontend (consumer app)

File	Change
<code>src/components/album/StickerCell.jsx</code>	Long press = decrement (was: open modal)
<code>src/components/album/StickerEditModal.jsx</code>	Delete (no longer used)
<code>src/data/stickers.js</code>	Add 6 countries, restructure to 48 teams + FWC + Stars
<code>src/data/starPlayers.js</code>	NEW — 20 players with tier classification
<code>src/data/pricing.js</code>	NEW — pricing matrix (tier × rarity)
<code>src/pages/AlbumPage.jsx</code>	Add Share + Settings buttons in header

src/pages/HomePage.jsx	Add "Refiere y gana" card + Settings in header
src/pages/StatsPage.jsx	Settings in header
src/pages/QrPage.jsx	Settings in header
src/pages/ShopPage.jsx	Rewrite — 4 sections, no tabs
src/pages/shop/MyPaniniPage.jsx	NEW
src/pages/shop/ExtrasPage.jsx	NEW — 20 players × 4 tiers grid
src/pages/shop/AlbumFillPage.jsx	NEW — 4 internal tabs
src/pages/shop/ProductsPage.jsx	NEW
src/pages/shop/ProductDetailPage.jsx	NEW
src/pages/SettingsPage.jsx	NEW
src/pages/ReferralPage.jsx	NEW
src/pages/auth/LoginPage.jsx	NEW
src/pages/auth/SignupPage.jsx	NEW
src/lib/share.js	NEW — generates the share text
src/components/shop/ShopHeroCard.jsx	NEW
src/components/shop/ProductCard.jsx	NEW
src/components/shop/CategoryCarousel.jsx	NEW
src/App.jsx	New routes: /settings , /referral , /shop/* , /login , /signup

Backend (admin + API)

File	Change
prisma/schema.prisma	Add StarPlayer , StarPlayerStock , update User , enums

prisma/seed.js	Seed 20 players + initial inventory + pricing
src/routes/admin/inventory.js	NEW
src/routes/auth.js	NEW — multi-provider login
src/routes/referral.js	NEW
src/services/referralCredit.js	NEW — 5% calc + crediting
src/webhooks/stripe.js	Decrement Star stock + credit referrer
web-admin/src/pages/AdminInventory.jsx	NEW — the grid table

13. Time estimate

Section	Hours
Sticker tap behavior + remove modal	0.5
Share button + repeats text	1.0
Settings header + page placeholder	1.0
Refiere y gana UI + 5% credit logic	4.0
Album data: 6 new countries + Stars section	1.5
Shop redesign (4 sections + 5 subpages)	5.0
Admin inventory feature (grid + endpoints + Stripe hook)	4.0
Auth: email + Google + Apple + Facebook	6.0
Pricing data + tier integration	1.0
Testing on iOS + Android	2.0

Total: ~26 hours

14. Recommended build order

To minimize blocking and maximize parallel work:

1. **Week 1 — data foundation**

- Update album data (6 countries, Stars section)
- Seed pricing matrix + 20 players + inventory
- Build pricing.js + starPlayers.js
- Admin inventory page (Branko can work on this in parallel)

2. **Week 2 — consumer app**

- Sticker tap behavior
- Share repeats button
- Settings button + page
- Shop redesign

3. **Week 3 — growth**

- Auth (full social login)
- Refiere y gana (UI + backend)
- Final testing + bug fixes

This sequence lets you test the core album experience early, then layer growth mechanics on top once the foundation is solid.

Spec last updated: May 20, 2026
